Job Specification

Role
Software Developer

it|venture

Here's a little bit about us

We're growing. Fairly rapidly. And that's why we need you. We're a dynamic, London-based firm that provides independent consultancy services and bespoke technology solutions to both top-tier and boutique investment clients within the private capital markets industry.

Formed in 2011, we have spent the last 11 years amassing a wealth of experience in delivering technical projects. We've worked on over 200 projects, for over 30 clients, across 20 different countries.

We work directly with our multi-national client base, providing innovative solutions using a variety of industry recognised software. Our team is made up of experts in implementation, reporting and configuration of these platforms, as well as highly skilled developers who deliver bespoke software solutions.

The role

Software Developer

We are seeking enthusiastic, self-motivated and talented individuals who are passionate about developing software and actively contributing to the direction of the projects we work on. Both in terms of the features of the solutions and the technologies used. The role will be in our expanding software engineering team, who provide bespoke desktop and web-based software solutions to our growing client base. This includes:

- Development of both front and back-end software solutions, utilizing appropriate frameworks, design and architectural patterns.
- Design and maintain efficient, reusable and reliable code ensuring the best possible performance, quality, and responsiveness of applications.
- Ability to estimate and plan your own work ensuring timeliness of deliveries.

About you

What we're looking for

Required Skills

- Strong knowledge of the Microsoft .NET Framework
- Experience developing both front and backend software solutions
- Proficient in C#, HTML, CSS and Javascript, with a good knowledge of their ecosystems
- Strong knowledge of Microsoft SQL Server or another RDBMS

- Proficient understanding of code versioning tools such as Git.
- Strong understanding of object-orientated programming and familiarity of various design and architectural patterns.
- Strong problem-solving skills and willingness to learn new technologies.
- Knowledge of the full software development lifecycle.
- Good time management and organizational skills, with an ability to multi-task/balance parallel work streams independently.

Desirable Skills

- Knowledge of .NET Core.
- Knowledge of Windows Presentation Foundation and MVVM Light.
- Knowledge of other backend frameworks such as Node.js.
- Knowledge of frontend frameworks such as Angular, React, or Vue.
- Knowledge of NoSQL databases such as MongoDB.
- Familiarity with unit testing and any relevant frameworks.

Experience and Education

- 3+ years' experience as a software developer.
- Minimum 2.1 degree in a numerate, IT or business systems related discipline.
- Experience of working within the private equity, real estate or alternative asset industries is desirable, but not required.

The benefits

What we offer

- A permanent position with a competitive salary.
- Discretionary bonus.
- Private healthcare.
